Summary

Cybersecurity professional with hands-on experience in Security Operations (SOC), Digital Forensics & Incident Response (DFIR), and Vulnerability Assessment & Penetration Testing (VAPT/WAPT), supported by 2 years of network engineering experience. Skilled in threat detection, alert triage, and security monitoring using SIEM (Wazuh), IDS/IPS (Snort), and network analysis tools such as Wireshark.

Experienced in digital forensic investigations including evidence imaging, metadata analysis, and timeline reconstruction using tools like Autopsy, with practical exposure to incident investigation workflows. Built and implemented security-focused projects including a SOC simulation platform (NetWatch SOC), DDoS detection system using Wazuh and Snort, network packet analyzer (Python/Scapy), and forensic investigation labs.

Strong foundation in networking (TCP/IP, VLANs, DHCP/NAT) across Linux and Windows environments, with the ability to analyze network traffic, identify anomalies, and support incident response and threat hunting aligned with real-world SOC and DFIR operations.

Work Experience

Zen Exim Pvt Ltd — Network Engineer (Switching) Dec 2024 – Present

- Designed and implemented secure network architectures across access, distribution, and core layers.
- Configured VLANs, trunking, and Layer 2/3 protocols with network segmentation and security controls.
- Monitored traffic using Wireshark for anomaly detection and troubleshooting.

PHP Infosec — L1 Network Engineer Apr 2024 – Dec 2024

- Configured MikroTik routers (DHCP, NAT, firewall rules) for secure network access.
- Supported network monitoring, troubleshooting, and secure configurations.

Internships

Cyber Forensics Solutions (CFSS) — Cyber Crime Investigator Aug 2024 – Sep 2024

- Performed forensic imaging, metadata analysis, and evidence reporting.

[\[Offer Letter\]](#)

Secuerium Technologies — Cyber Security Intern Aug 2025 – Sep 2025

- Conducted VAPT/WAPT using OWASP Top 10 methodologies.
- Identified vulnerabilities and provided remediation recommendations.

[\[Certificate\]](#) [\[LOR\]](#)

Prodigy Infotech — Cyber Security Intern Jul 2024 – Aug 2024

- Developed Python-based security tools and packet analyzer.

[\[Certificate\]](#)

Sigma Training Institute — Cyber Security Intern Feb 2024 – Mar 2024

- Conducted penetration testing and OSINT investigations.

Tech Defence Solutions — Cyber Security Intern Aug 2023 – Sep 2023

- Performed incident response labs and phishing simulations.

[\[Certificate\]](#)

Projects

Digital Evidence Investigation (Autopsy)

Aug – Sep 2024

- Performed forensic image analysis, recovered deleted files, and reconstructed user activity timelines using Autopsy.

Network Packet Analyzer Tool

Jul – Aug 2024

- Built a Python/Scapy tool for live packet capture, protocol dissection, and PCAP export.

Network Traffic Analyzer for DDoS Detection

Apr 2025

- Implemented real-time monitoring using Wireshark, Snort, and Wazuh to detect DDoS attacks and IP spoofing; configured custom Snort rules and Wazuh alerts.

Metasploitable 2 VAPT Lab

Sep 2025

- Conducted full VAPT identifying vsftpd 2.3.4 backdoor and Samba RCE; documented exploitation steps and remediation recommendations.

Caesar Cipher Cryptography Toolkit

[GitHub](#)

- Developed a multi-cipher toolkit supporting Caesar, Vigenère, Base64, ROT13, and Atbash with AES-256 encryption (Tkinter GUI + Flask web app).

NetWatch SOC – Security Operations Center Platform

[GitHub](#)

- Designed and developed SOC-style monitoring platform for real-time traffic analysis and threat detection.
- Implemented intrusion detection scenarios (port scanning, abnormal traffic patterns).
- Integrated SIEM-based alerting workflows (Wazuh, Snort).
- Built dashboards using React and TypeScript.
- Simulated SOC operations including alert triage and incident reporting.

Education

Silver Oak University, Ahmedabad, Gujarat

Apr 2025

B.Tech in Computer Science Engineering (Cyber Security)

CGPA: 8.36

Eklavya School of Science, Ahmedabad, Gujarat

May 2021

Higher Secondary (HSC), Gujarat Board

65%

Certifications

Google Cybersecurity Professional (Coursera)

→ Foundations of Cybersecurity

[\[Certificate\]](#)

→ Connect and Protect: Networks and Network Security

[\[Certificate\]](#)

→ Manage Security Risks

[\[Certificate\]](#)

Cisco Networking Academy — Networking Basics

[\[Certificate\]](#)

Red Team Leaders — Certified Red Team Operation Manager (CRTOM)
